

MIGUEL FORTE

<JUNIOR FULLSTACK DEVELOPER_>

From working in a small-time hotel, to becoming a passionate pianist, to being part of an Italian brotherhood, to becoming a programmer, life never ceases to surprise me.

Working as a receptionist, I learned how to always greet people with a smile, and have a light-hearted nature. As a pianist, I had the chance to nourish my creativity and show people how beautiful it can be to hear someone play with true passion. As a fratello, my fortitude was tested more than I ever thought possible. Every day we worked hard in the field as a team, growing stronger. As a programmer, it's a true privilege to learn and create constantly. Much more awaits me on this path.

Learning from past hardships, giving my very best every day, rejoicing at how each day is a blessing, and having fun - these are the main principles I live by.

At the <Academia de Código_> practise was the word of the day every day. As such, we had 2 major group projects. Our first project consisted in developing a game in under 2 weeks. It was developed in Java using the SimpleGfx library, with just 4 weeks of experience. Our final project, a web server and a web app - "IWantToBreakFree" - was an Hackathon project, made in under 24h. The backend was developed in Java(11), using JPA, Hibernate (5.3.6), Spring (4.3.11), MySQL(8.0), MVC, and REST. For the frontend we used HTML, CSS, Javascript, Ajax, and JQuery. We also used Maven, Git, and Tomcat. It really was a fantastic experience.

WORK EXPERIENCE

Hotel Mateus Jun 2014 – 2018

RECEPTIONIST

Casa das Quinas Aug – Sep 2017

WAITER AND BARISTA

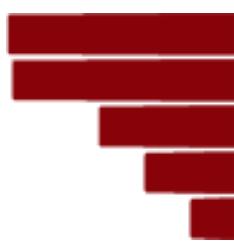

TECH EDUCATION

Sep – Dec 2018

<CODE CADET> @ <ACADEMIA DE CÓDIGO_>

A 14-week intensive and immersive Java && JavaScript fullstack coding bootcamp.
